

Monochromatic

Shades and tints of only one color

Complementary

Two colors located opposite from each other on the color wheel.

Split Complementary

One color plus the two colors adjacent to its complementary color.

Double Complementary

Two pairs of complementary colors. The pairs' distance apart will affect the contrast of the color scheme.

Triad

Three colors that are an equal distance apart on the color wheel.

Analogous

Colors that are adjacent to each other on the color wheel.
